NAME: GWLA-0319

Copper Seat Open Gear Type Medium Speed Winding Machine

GREWIN INDUSTRIAL GROUP CO.,LTD.

Add: The fourth floor A-A3 zone aviation business area,Dongli Distr,Tianjin,China.

FEATURES :

1. Microcomputer program controller, simple operation.
2. Data input memory 50 specifications, each specification can be preset 20 running programs.
3. Double frequency conversion proportional drive, can choose automatic operation or pedal speed control operation.
4. Can be stepless speed regulation, according to different product process requirements set the appropriate winding speed.

SPECIFICATION: Main technical parameters table: (Unit: mm)

Equipment model	GWLA-0319
绕线方式 Winding mode	齿轮式 Gear type
最后完成外径 Finally complete the outside diameter	60-200
最小完成内径 Minimum finished inside diameter	25
最大完成高度 Maximum completion height	80
适绕线径范围 Suitable winding diameter range	0.5-1.6
储线环直径 Diameter of wire storage ring	250
储线环宽度 Width of storage ring	3-8
储线环深度 Depth of storage ring	10/12/16
最高转速 Maximum speed	230 转/分 230 RPM
工作电压 Operating voltage	220V/50HZ
外形尺寸 Overall dimension	500x600x750

EQUIPMENT FEATURES:

1. Gear type winding machine has the characteristics of large winding torque, high opening size of tooth ring/wire ring, large storage amount of wire and wide range of suitable winding diameter.
2. It is the most widely used winding machine. It is suitable for products with thick winding diameter, tidy wiring requirements and multi-stranded wire winding, such as small ring transformer secondary winding, high power ring transformer primary winding, large wire diameter inductance magnetic ring, etc.
3. Current transformer coil and adjustable resistance.
4. According to the overall size of the product, complete the internal diameter, turns and other parameters, calculate the length to be wound, choose the appropriate size of the model.
5. The same model can be replaced with different widths of the storage wire ring, in order to meet the different size of the product line storage and complete diameter, a wider range of application.
6. The jig can be adjusted in a wide range, the linear density can be adjusted quickly and the segmented linear density can be adjusted. It is especially suitable for winding transformer products with multiple windings.
7. Suitable for winding wire of various types, such as enamelled copper wire, enamelled aluminum wire, steel wire, nylon wire and resistance wire, can be used for coil processing of various industry products.

APPLICATION:

Toroid Winding Machine is the best suited to toroidal inductor, toroidal transformers, toroidal current transformers, toroidal coil, toroid choke coil, power inductors, UPS inductor, converter inductor and heavy toroidal core etc.

PRACTICAL APPLICATION :

TRAINNING CUSTOMER TO OPERATE WINDING MACHNE :

- 1.All service engineers with 10 years experience are gotten special technology training, who can deal with various breakdown problem.
- 2.Guide the user to use accurately and how to maintain the product.
Provide free consultation about production process technology of electronic products.
- 3.In order to guarantee the machine used normally, we'd have training on how to operate, use and maintain our product by English manual, video, guiding on line.

PACKAGING:

Packaging Material: Carton/Wooden case with foam inside.

1.General package(Paper carton or plastic bag): For small equipped parts for Toroidal Transformer Winding

Machine , Package it with form and pack paper to guarantee unbroken during the transport.

2.Wooden case package: For larger scale Toroidal Winding machine ,we have special skilled carpenter, who would make the proper wooden case with exact thickness,density,length. The up arrow ↑marked on the outer wooden case. Buffer material would be put in the wooden case to prevent crack and shock.

Below is the name of all listed accessories for the machine and construction diagram.
(Note:Different machines have different equipped parts)
